Primary Features

1. Trail Information
   A small wooden sign gives an overview to the trail system that a person is about to begin. Information might include distances, average walking times, and fitness trail equipment location.

2. Picnic Tables
   Recycled composite picnic tables can be used in an informal layout for multiple occasions when the weather is pleasant. Church groups and visitors to the park can use them for gathering or meals.

3. Main Pavillion
   This single section pavilion is where all the park information and community message boards can be found. There is one common gathering space with picnic tables under the covered structure. Access to the park is located beside the pavilion. Restrooms are included as a potential later option.

4. Social Fitness Area
   A space dedicated to fitness, this area provides both personal and social fitness opportunities. Obstacle course equipment provide a different type of exercising. A children's play is in between the pavilion to allow parent supervision in different locations. Finally, it is sited just into the woods for shade.

5. Open Green Space
   This space is open for free use. It can be used for exercise, playing catch, or simply lounging in the sun.

6. Park Welcome Sign and Plantings
   This sign is to welcome visitors to the park from Main Street. It will contain information such as supporting groups of the park as well as park hours. Colorful and multi-season planting create an attractive corner for the church and park entrance.

7. Reflection Area
   A small shaded gathering space along the woods' edge provides an area for personal retreat or space for small social gatherings.
