A. Instructor's station and educational area creates a semi-structured education space with demonstration tables, storage, and moveable, hewn log seating for class activities with a revegetated rhododendron thicket background.

B. Forest gardens and an information kiosk mark the entrance to the outdoor classroom area. The frontier, edible, and aesthetic gardens allow students and visitors to get hands on experience with various native plantings.

**Materials**
- Split-Timber logs for groundlevel benches to accommodate students.
- Oak planks for the instructor station provides onsite storage and activity space for classes.
- Mulch derived from shredded leaves and compost materials within the forest and donated by the town for planting the forest gardens.

**Formal Instruction**
- Lessons
- Demonstrations
- Special Programs

**Class Activity**
- Connection to S.O.L's
  - Soil and Rock Classifications
  - Natural Process
  - Meteorology
  - Wildlife and Plant Cycles

**Revegetation Zone**
- Native Planting
- Classroom Lessons
- Monitoring Growth

**Wise County Nature and Fitness Trail**
